Register of MOs - (OMNA)

OMA is managing a registration program called OMNA. This registry is used by OMA and non-OMA groups to register their profile data.

In OMNA there is one registry dedicated to register **Management Objects** defined by OMA, other Standard Development Organizations, (SDOs), or private companies.

OMNA Ranges for Management Objects

Category	Description
OMA-label	Assignments of values to MOs defined by OMA Work Groups
ext-label	Assignments of values to MOs defined by external entities
x-label	Values that are used for testing or private use – will not be recorded

The list of MOs listed above are available via the **eMO Editor**.

Please click here for more information on **DM Management Object (MO) Registry**.

Device Management OMNA Request Use Case

Device Management (DM) Management Object (MO) OMNA Request Use Case	
1	Complete the following form: http://technical.openmobilealliance.org/Technical/technical-information/omna/omna-request-dm-mo-registry
